

Request for decision: **D27-2016**

Subject matter: Virtual Desktop Infrastructure Project

Executive summary:

This paper outlines the current status of the Virtual Desktop Infrastructure (VDI) Project, the implications for the project of the changes in the operating environment of the Constabulary since the project's initiation and of continuing the project at this stage.

Recommendations (with reasons for that recommendation)

It is recommended that the project is formally closed and spend to date is, as far as feasible, repurposed towards other projects where there is a current evidenced need.

Police and Crime Commissioner

The above request has my approval, with the following caveats:

- that the Chief Constable carries out a desktop review to explore how the Force has arrived at the current position;
- that an independent review be undertaken by Internal Audit.

Signed:
